[1] Bulb holder with ceiling rose

[2] Supporting element

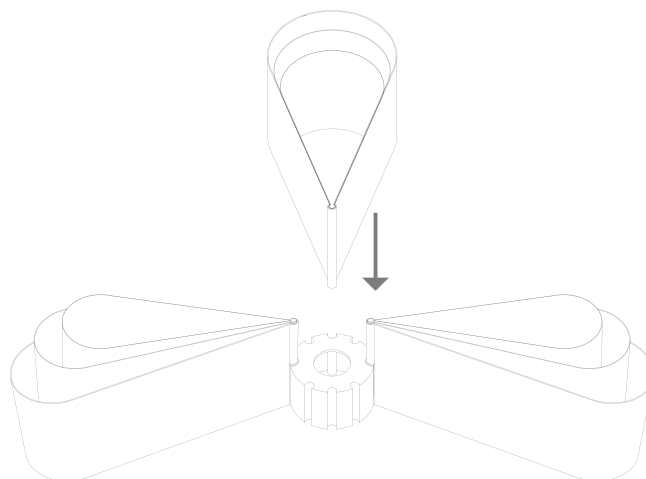

[3] Lampshade elements

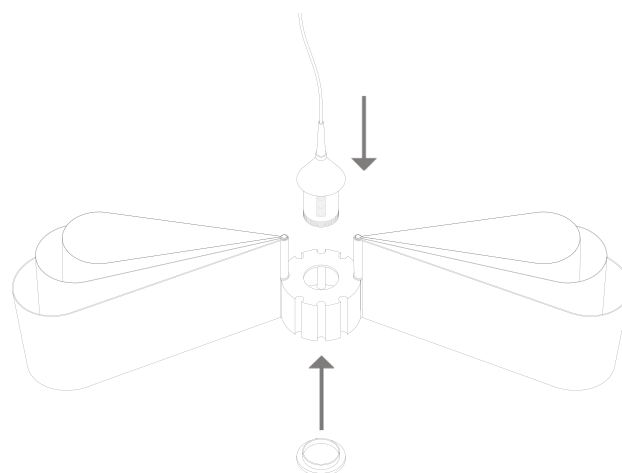

1. Assembling the individual lampshade elements

Prepare 3 elements in three different sizes: S, M, and L. Start by inserting the M size into the L size as shown in the illustration, so that the outer edges of the elements overlap. Next, insert the S element. This will create one complete "petal" of the lampshade. Repeat this process 8 times.

2. Place the assembled elements into the holes in the supporting part.

3. Insert the bulb holder into the central hole and tighten the mounting ring. Then, screw in the bulb.
